Professional Summary:

I am an aspiring full stack/backend developer with a strong foundation in HTML, CSS, JavaScript, Java, Python, and C. I am proficient in development tools like IntelliJ, NetBeans, and Visual Studio, and highly computer literate with Microsoft Office Suite. Currently I am studying Computer Science in application development at Varsity College. I am, however facing possible deregistration due to financial constraints. I have been doing self-studying Udemy courses to increase my knowledge base and build real-world coding skills. I am a fast learner, motivated, and an effective communicator, now seeking an opportunity to grow through hands-on industry experience.

Experience:

No work experience

Skills:

Computer literacy: I am very efficient with computers and software's such as Word, Excel, PowerPoint and Access
